

CARBOFIX
Orthopedics

CarboClear® Lumbar Cage System

The perfect combination of Carbon Fiber & 3D printed Titanium endplates

- **3D printed Titanium: porous endplates for optimal bone in-growth**
- **Carbon Fiber-PEEK core: optimal mechanical properties & visualization**
- **Secure mechanical bond between the Titanium endplates and the Carbon Fiber-PEEK core: No delamination**
- **Extra large bone graft compartment**
- **Radiolucent for earlier & better fusion visualization**
- **Minimal artifacts in CT/MRI for enhanced follow-up**
- **PLIF or TLIF**

Endplates: 3D printed Titanium

Carbon Fiber reinforced PEEK
